UPDATE

Does this section even need an introduction? From computers to mobiles, and headphones to GPUs, it's all here...

SMARTPHONE CHIPSETS

MediaTek Dimensity 9600 Pro launched with 2nm Chip

MediaTek has launched the Dimensity 9600 Pro, a flagship smartphone chipset built on a 2nm process, promising improvements in performance and power efficiency. The company claims the chip delivers up to 17% higher single-core performance and 15% higher multi-core performance, alongside a 61% reduction in multi-core power consumption.

Featuring a dual-NPU architecture, the chipset supports advanced on-device AI capabilities. Its G2-Ultra NX GPU promises 27% higher peak performance and 18% faster ray tracing. The Dimensity 9600 Pro also supports advanced imaging features, including 4K recording at 240fps for slow-motion video.

HOME APPLIANCES
