IIM LUCKNOW

THE BEST LESSONS I LEARNT

SHAILESH JEJURIKAR
CEO, Procter & Gamble
Batch of 1989

"The most enduring management lesson I learnt was the power of a learning mindset, or learning how to learn. In a rapidly evolving world, being a 'learning leader' is essential. It begins with the humility to recognise that I don't have all the answers and the curiosity to keep asking questions every day. The close-knit faculty-student community at IIM Lucknow provided the ideal environment to cultivate this mindset. Moreover, being part of a newly established business school instilled a strong sense of ownership and institution-building, which helped shape my approach to leadership."

TANIYA BISWAS
Co-founder, Suta
Batch of 2013

"My biggest management lesson at IIM Lucknow was that individual excellence can take you far, but relationships are what help you scale. In my second year, I started and ran a women's salon with two friends, made it profitable, and eventually passed it on to my junior batch. IIM-L gave me the freedom to experiment through live projects, industry interactions and peer learning. I learnt to juggle multiple responsibilities, but more importantly, to build a circle of people who challenge, support and back you when you cannot be in every room. Leadership is never a solo sport."

STUDENTSPEAK

RIDDHI GARG
Blended MBA, 2nd year

"It has been an exhilarating and overwhelming journey at IIM Lucknow. Balancing classes with work, I learn something new almost every day. Being on campus feels like entering another world, buzzing with energy, inspiration and people who push you to grow"

INDIAN INSTITUTE OF MANAGEMENT LUCKNOW (IIM-L), *LUCKNOW*

ment education into closer conversation with technology and specialised sectors. A joint postgraduate programme in Healthcare Management with IIT Kanpur combines managerial training with technological understanding. At Noida, the Enterprise Incubation Centre has launched a Centre of Excellence in Blockchain Technology, supported by the Uttar Pradesh government under its StartInUP policy, with Microsoft India as technology partner. It aims to incubate 100 blockchain start-ups over five years.

The institute's work also extends to campus well-being. Established in 2023 in partnership with the Rekhi Foundation, the Rekhi Centre for the Science of Happiness conducts behavioural research and runs mind-labs focused on individual well-being. "By integrating emerging technologies with sound managerial judgement, strengthening Indian enterprises and advancing research that shapes business and public policy, the institute aims to contribute to Viksit Bharat@2047," says institute director Prof. M.P. Gupta. This reflects the institute's ambition to connect management education with the needs of business and society. ■
