She is preparing now for the next chapter of KNMA, with plans for a sprawling, over one-million-square-foot museum (touted to be the largest museum in South Asia) and cultural centre near Delhi's International Airport, expected to open in the next 2-3 years. The project marks a major step in her effort to make art more accessible to the public.

"I think we are at a very exciting point in India, with more private and public institutions coming together, a growing gallery ecosystem, and an increasing number of biennales and art fairs," adds Nadar.

Industrialist Sunil Kant Munjal, Founder-Patron of Serendipity Arts, echoes this view. "Historically, art has never survived without patronage. That role has evolved from royalty and religious institutions to governments and, increasingly, private individuals and organisations. In India, the private sector has a much larger role to play than it currently does," says Munjal.

Over the past decade, Serendipity Arts has worked to bring artists and audiences closer. Its tenth edition in 2025 featured 280 projects, brought together more than 2,200 artists across over 22 venues, and drew more than two million visitors.

But widening access, Munjal believes, requires investment that goes beyond festivals. Art, he says, should be part of everyday life.

India has one of the richest cultural heritages in the world, yet access to this heritage and contemporary art remains limited. India has extraordinary artists and practitioners but talent needs an ecosystem to nurture the culture.

The attempt to bridge this gap is through THE BRIJ—a large-scale arts and cultural centre being developed by the Serendipity Arts Foundation in the National Capital Region.

The initiative aims to create a broader support system for artists and cultural practitioners, while helping build a creative economy that generates not just cultural value but also opportunities for entrepreneurship, employment, and innovation.

For Munjal, the measure of a successful society goes beyond economic growth. It also lies in how well it nurtures imagination, sensibility, and the ability to engage with different ideas.

The true measure of India's art boom, therefore, will not be how much its masterpieces sell for, but in the legacy it leaves behind. BT
