

Double the Allure

FOR THE DISCERNING collector, true luxury lies at the intersection of impossible craftsmanship and unyielding heritage. For collectors who appreciate the precision of fine watchmaking as much as the power of cutting-edge technology, Caviar's bespoke iPhone creation brings two worlds of luxury into a singular statement piece. Limited to three units, the edition combines an Apple iPhone chassis with an authentic 40mm 18K yellow gold Rolex Cosmograph Daytona, bringing together smartphone design, motorsport history, and fine watchmaking.

CAVIAR CUSTOM IPHONE DAYTONA
PRICE on request

Drawing deep inspiration from Malcolm Campbell's legendary 1930s Blue Bird supercar, the pioneer who chased ground-speed records on the Daytona tracks, the multi-level titanium chassis is wrapped in Rolex-grade black PVD coating. The rear panel unfolds as an artistic homage to automotive history, featuring a 24K gold-plated dashboard complete with handcrafted jewellery enamel speedometers and oil indicators. It is anchored by the Rolex's iconic self-winding mechanical chronograph movement and a black monobloc Cerachrom ceramic bezel.
