curated. In this regard, it also touches upon the Yatra's implications for the Congress party and its stakeholders. Section two highlights what the BJY was experientially, for those who walked the entire stretch and those who joined it temporarily. Finally, section three reflects on what the Yatra is normatively—to the people and the nation at large. In doing so, the essays in this section draw from the BJY to propose disruptive and innovative ideas to further the constitutional Idea of India.

Section one outlines the organizational effort and military precision with which this monumental exercise was curated.
