

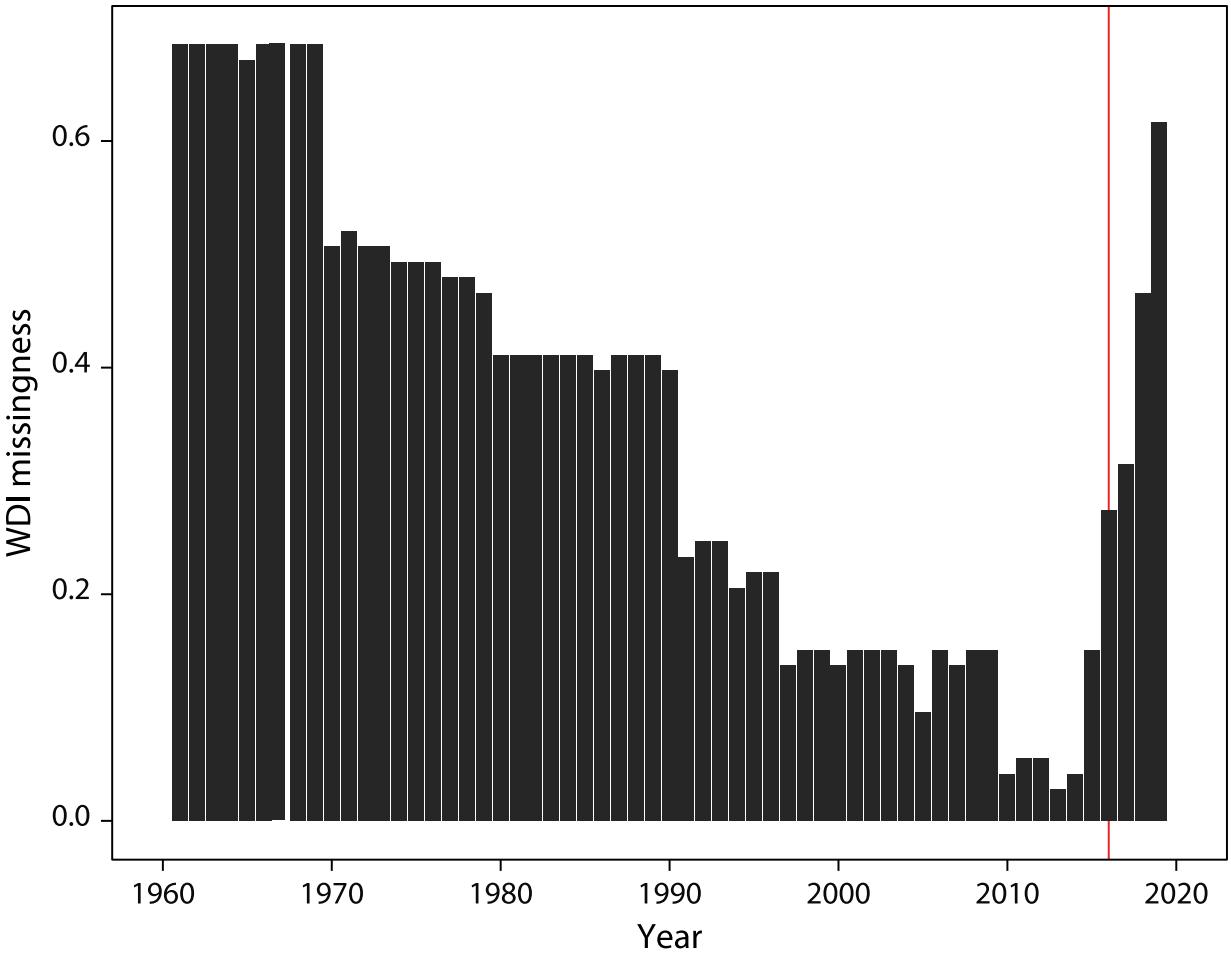

FIGURE 4.8. Share of US missing WDI data, 1960–2019. Data come from the World Development Indicators. Variables are matched with those from Hollyer, Rosendorff, and Vreeland (2014). The vertical line again demarcates 2016 (the year of Trump's election).

The evidence presented in this illustrative case aligns closely with our theoretical framework. Under Trump, the United States curtailed information flows to development IOs through suppression, distortion, and funding cuts, prompting US-led IOs to actively forge new information-sharing agreements. This response was not limited to new partnerships but extended to long-standing institutions, indicating a deliberate strategy to diversify information sources.

These dynamics generalize to other populist-led states, reinforcing the broader relevance of our findings. By highlighting the interplay between populist governance and IO behavior, this analysis underscores the
