

(a) Populists

(b) Nonpopulists

FIGURE 6.3. Most common words appearing in Grays. Common stop words, punctuation, words systematically used in headers and document-naming conventions, and numbers are removed. We constructed the clouds using the program Wordle.

Earlier chapters illustrated how IOs adapt to bolster resilience against populist threats by appeasing or sidelining leaders. This chapter switched the focus to the "two-level games" IOs must play in order to secure cooperation, balancing relationships with member-state leaders while managing the perceptions and reactions of domestic audiences (Putnam 1988). In doing so,
