"Marvel's *Captain America: Civil War* was such a unique experience for me because Joe and Anthony Russo brought me—and the other main board artist, Anthony Liberatore—into the project incredibly early in the process," Storyboard Artist Darrin Denlinger says. "In those early days, we had many meetings with the core creative group, really poring through just an early outline from writers Chris Markus and Stephen McFeely, hashing out beat sheets, and pitching action ideas. This is where the Bucky chase sequence really took shape, creating a narrative framework to hang all the amazing ideas that were being generated from everyone. From there, it was a matter of picking and choosing the best stuff and, once photos from the initial Berlin location scout came in, focusing in on the beats that could really exploit those wonderful locales."
