The role of the all-American hero eventually went to Chris Evans, an actor capable of the range required in Captain America's transformation. Said Evans, "I went and met with Joe and Kevin and Stephen, and they sat me down and gave a really good pitch of who this character was — and it's a pretty good story even independent of its super-hero aspect. It's about a guy who has a lot of shortcomings and who still chooses to not become jaded or bitter about it. He's a good man, an honest man, a noble man — and as a result of those virtues, he's given a gift. He's able to balance this new life he has with the old set of morals."
