

Concept Artist Andy Park played with different materials for Black Widow's appearance. "I experimented with giving her costume a two-tone look not only in values but also in sheen and material," Park says. "Her past costumes pretty much had her in one consistent material throughout the outfit, with the lines created mostly with tubing and stitch lines. With this take on the classic Black Widow look, I wanted the lines of the costume to be created by the transition from one material to the next."
