

Saunders' final version of the Stark Jet (above) revealed inspiration from aircraft as diverse as the F-22 and the Boeing responsible for toting the Space Shuttle around. SAUNDERS: "It evoked some aerodynamic forms that we've all seen before and that we associate with the highest of the high-tech, so it's not completely sci-fi. But it's still exotic enough that we think, 'Wow. This is miles ahead of your standard business jet!'"
