

Oliver Scholl

Set continuity still

Riva: "Iron Man is essentially about a regular guy who's narcissistic, who learns a lesson very early on and has to redeem himself, and that's a pretty common story so you don't want to surround it with too much gear and gizmos. You can do that, but the primary focus is a real story, so you try to create a real environment around there, so people don't spend a lot of time figuring all that out. They're watching the performer go through an arc."
