1) Open & Drop Case

2) Jump into boot bottoms & insert hands into gloves to trigger activation

3) Stand & fully extend arms into a stretch, arch back

-Suit deploys in a wave away from the extremities in concert with this motion

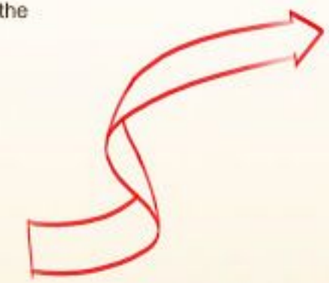

4) Raise faceplate into position

-Faceplate will then clasp shut as the rest of the suit does

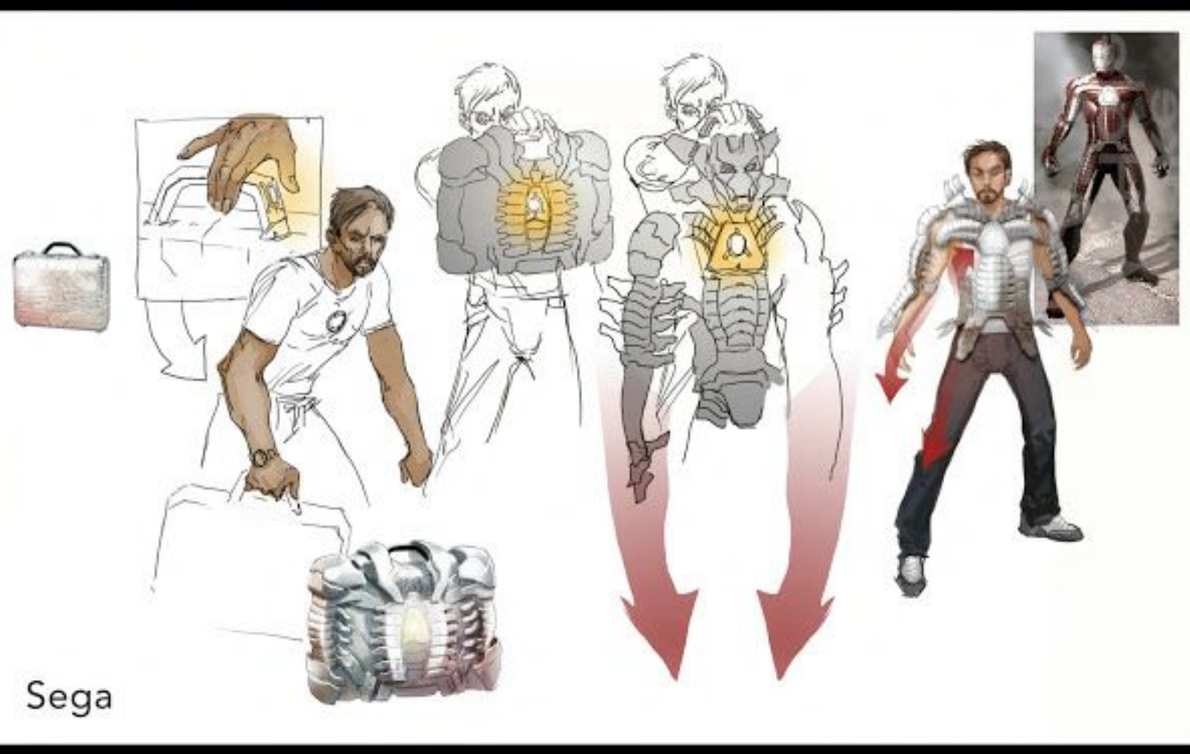

Super-heated suit glows momentarity before the ultra thin titanium nickel panels cool off

Jonathan Bach

Meinerding: "The suitcase was one of the first things I started working on, and we got it to a place where Jon [Favreau] was like, okay that's reasonable, let's try and get the visual effects vendor on board to take it to the next level with how it's actually going to come out of the suitcase. So that was probably about a month, two months with different variations, and these are some of the other variations."
