IRON PATRIOT

Ryan Meinerding concept art.

The original Iron Patriot look had been established in the comics, where the suit was cobbled together by one of the Avengers' enemies in a misguided attempt to inspire the world with a hero reminiscent of both Iron Man and Captain America. "In *Iron Man 3*," Meinerding explains, "someone in the government has taken a look at War Machine and said, 'I can make that better, more patriotic.'"
