

Andy Park concept art.

MARK 33
"SILVER CENTURION"
ENHANCED-ENERGY SUIT

Park: "The Silver Centurion was the design I was obsessed with as an adolescent. *Iron Man #200* got me into comic books. I actually stopped collecting the book when the Silver Centurion armor got destroyed and he went back to the old red-and-gold color scheme. The hardest part to pull off was the drastically different bullet-head shape he had in the comic book."
