Hawking’s research on, 11, 92–93
human bodies built out of by-products of, 46
logic of theory of, 21–22
nucleosynthesis during, 45–46
Planck Time and, 35, 36, 37
popular conception of, 21
quark-gluon plasma phase in, 43–44
question of what was “before,” 33
reheating process in, 42
singularity at beginning of, 32–35
surface of last scattering in, 46–47
tracing history of the universe backward to, 22–23
uniformity problem in, 39–40
universe-antiuniverse pair in, 176
Big Bang Nucleosynthesis, 45–46
Big Crunch, 51, 61–66, 128
cosmic distance measurements and possibility of, 69–70
critical density in, 68–69
cyclic universes and, 65
impact of, 62–63
redshift and blueshift measurements before, 62
signs of impending collapse in, 61–62
Big Rip, 105, 207
calculation of earliest possible date for, 115, 128
destruction process in, 112–14
electromagnetic forces and, 113–14
loss of galaxies and, 112–13
orbits of planets and, 113
phantom dark energy and, 115
star systems and, 113
timeline for, 114 (fig.)
blackbody curve, 28–29, 29 (fig.)
black holes
Andromeda Galaxy–Milky Way collision and, 51–52
Big Crunch impact and, 63
Big Rip and, 114
cosmic expansion and, 61
