electromagnetism, 138, 164, 181
dark matter and, 67
Grand Unified Theory and, 37, 43
Higgs field in early universe and, 134, 136
mathematical expression of, 138
quark era in early universe and, 44
electron degeneracy pressure, 122–23, 124
electroweak force
Grand Unified Theory on, 43
Higgs field and, 136
quark era in early universe and, 44
research confirming theory of, 159–60
spontaneous symmetry breaking and, 134
electroweak symmetry breaking
early universe impact of, 139–40
Higgs field and, 140, 142
process leading to, 136
Ellis, John, 197
end of the world
Big Rip and, 112–14, 114 (fig.)
cosmological constant induction of, 82, 96
cyclic view of the universe and, 3
dark energy and, 106
extra dimensions of space and, 155
new scientific findings and new perspectives on, 7–8
Nietzsche’s view of, 3
red giant phase of the Sun and, 1
religions and vision of, 2–3
secular views of, 3–4
seeking meaning of existence and, 4
entropy
black holes and, 93–94
direction of time and, 91–92
disorder and, 90–91
Heat Death and, 173
increase over time of, 91
Epoch of Reionization, 49
