equation of state parameter, 109, 114, 186
eschatology
  academic research on, 178–79
  cyclic view of the universe and, 3
  definition of, 2
  secular views in, 3–4
  vision of End Times in religions and, 2–3
Espinosa, José Ramón, 192n, 197–98
evaporation process, in black holes, 11, 89, 95, 96, 144, 151, 152
expansion of universe. *See* cosmic expansion

false vacuum, 143, 143 (fig.), 147, 154
fermions, 121–22
Ferreira, Pedro, 183, 191, 209
Finn, Kieran, 175
flat universe, 75, 76 (fig.)
Frost, Robert, 1, 4
Future Circular Collider (FCC), 195–96

Gaia star map, 113n
galaxies
  ability to see distant galaxies, 83–84, 85 (fig.)
  Andromeda Galaxy–Milky Way collision, 51–52, 62–63, 88
  Big Crunch impact on, 62–63
  Big Rip and loss of, 112–13, 114 (fig.)
  Copernican Principle on, 18
  Cosmic Dawn and beginning of, 49
  cosmic expansion and, 54, 61
  cosmological constant and, 107
  cosmological principle in, 17–18
  dark energy and, 106, 107
  distance and apparent size of, 86–87, 87 (fig.)
  distance ladder measurements and, 119 (fig.)
  Epoch of Reionization and, 49
  gravitational lensing and, 68, 189
  Hubble-Lemaître Law on speed-distance proportionality of, 58
  light-year unit for observation of events and distance in, 16–17
