possibilities of planets with other beings in, 50
rates of collisions between, 52–53
recession speed of, 83–84
redshift measurement process for, 55–56, 57 (fig.)
redshift measurements for distance of, 57, 58–59
seeing galaxies currently moving away from us faster than light, 87–88
shape of space and, 68
gamma rays, 55, 65
general relativity, 8, 78, 124, 155, 157, 162
cyclic universes and, 66
gravitational attraction and, 108
search for some kind of deviation in, 158–59
singularity at beginning of the Big Bang and, 33–34
General Theory of Relativity. *See* general relativity
gluons, 43–44
God Particle, 133–34. *See also* Higgs boson
Grand Unification, 37
Grand Unified Theory, 36, 160
beginning of the Big Bang and, 36–38
gravitational lensing, 68, 189
gravitational waves
astronomical observation using, 157–58
effect on human body of, 158 (fig.)
first detection of, 157
inflation models for, 172
measurement of, 189–90
primordial, evidence for, 171–72
quantized gravity theory and, 160–61
gravitons, 160–61
gravity
Big Crunch impact and, 63
cosmic expansion and, 61
cyclic universes and, 66
dark matter and, 67, 68
deceleration of universe and, 72, 7 4
effect of pressure and, 108
Einstein’s theory of, 8, 10, 32, 66, 68, 75, 77
