potential of, 142, 143 (fig.), 147, 197
potential barrier and, 149
quantum tunneling and, 149
vacuum decay and, 144–45, 147–48
Higgs potential, 142, 143 (fig.), 147, 197
Higgs vacuum, 140, 141, 142
high-energy event, and vacuum decay, 147–48
Hložek, Renée, 188, 209, 210
Hot Big Bang
black hole formation in, 151
cosmic microwave background and, 47
description and span of time of, 22
inflation field and, 167
LHC re-creation of conditions for, 130
Hubble, Edwin, 57–58, 79, 118n
Hubble Constant, 189
cosmic expansion and, 58, 125
debates about calculation methods for, 126–28, 189
Hubble-Lemaître Law and, 58
Hubble-Lemaître Law, 58, 59, 62, 69
Hubble radius, 83–86, 85 (fig.), 88
hydrogen
Big Bang Nucleosynthesis and, 45, 46
decay of, 89–90
red giant phase of the Sun and burning off of, 121
Sun’s fusion of, 120
hydrostatic equilibrium, 120

Ijjas, Anna, 173
infernoverse, 23
inflaton field, 167, 171

James Webb Space Telescope (JWST), 187
Johnson, Matthew, 99
Johnson, Clifford V., 184, 190, 199–200, 202

Kibble, Tom, 26n
