singularity at beginning of the Big Bang and, 33–34
symmetry in, 136–39
Planck, Max, 35
Planck satellite, 115
Planck Time, 35, 36, 37
planets
Big Crunch and birth of, 63
Big Rip and orbits of, 113
red giant phase of the Sun and destruction of, 121
Poincaré recurrences, 99, 103, 201
Pontzen, Andrew, 180–81, 206–7
potential
Higgs field and, 142, 143 (fig.)
vacuum decay and, 141–42
primordial gravitational waves, 171–72
Pritchard, Jonathan, 208–9
protons, decay of, 89

quantum field theory, 11
quantum gravity theories, 34, 160, 199
quantum mechanics, 148, 149, 155
cyclic universes and, 66
density fluctuations in cosmic inflation and, 43
gravity and, 160
Many Worlds interpretation of, 169n
singularity at beginning of the Big Bang and, 33–34
quantum tunneling, 148–50
quark-gluon plasma, 43, 44
quarks
early universe and, 43–44
particle colliders and, 130–31
quantum gravity theory on, 160
Standard Model of particle physics on, 181
types of, 131n
quintessence hypothesis, for dark energy, 80–81

radiation, density over time of, 97 (fig.)
