radio telescopes, 20, 24, 25, 132–33
recollapse of universe, 76, 81, 177
  critical density between eternal expansion and, 68–70
  final stages of the Big Bang and, 64–65
  theoretical possibility of, 70n
red giant phase of the Sun, 1, 52, 73, 121
redshift measurements
  Big Crunch and, 62
  cosmic expansion and, 55–57, 57 (fig.), 73, 74
  distant galaxy movement and, 57, 58–59
  earlier epochs of the universe and, 59
  Hubble radius and, 83
  importance of distance and age relationship with, 59–60
Rees, Martin, 177, 205–6
reheating process, in cosmic inflation, 42
Relativistic Heavy Ion Collider (RHIC)
  public concerns about, 131, 132, 133
  quark-gluon plasma re-creation in, 44
  vacuum decay possibility and, 133
religion
  cyclic view of the universe and, 3
  discomfort with mixing of science and, 134
  vision of End Times in, 2–3, 4
RHIC. *See* Relativistic Heavy Ion Collider
rotational symmetry, 138–39
Rubin, Vera, 67–68

Sagan, Carl, 46
scalar field, in ekpyrotic models, 171, 174
Schwarzschild radius, 94n
Second Law of Thermodynamics, 91, 93, 97, 98, 104
shape of space
  geometry of universe types and, 75, 76 (fig.)
  gravitational waves and, 158
  matter and bending of, 68, 108
  response of light related to, 68
singularity
