hydrostatic equilibrium in, 120
light spectrum pattern characteristics of, 27, 55–57
possibilities of planets with other beings in, 50
redshift measurements of, 55–56
shape of space and, 68
supernovae explosions and distance measurements in, 73–74, 75, 79, 81, 84, 118–19
Star Trek: The Next Generation (TV series), 18n, 163
statistical mechanics, 98–99
Steinhardt, Paul, 166, 173
string theory, 160
research conducted in, 10n
as ultimate Theory of Everything, 36–37
Sun
Big Rip and, 113
distance and apparent size of, 86
electron degeneracy pressure and collapse of, 122–23
gravitational pull of, 159
hydrogen-helium balance in, 120–21
red giant phase of, 1, 52, 73, 121
supernovae explosions
distance measurements in universe using, 73–74, 75, 79, 81, 84, 118–19
electron degeneracy pressure and, 122–23
Supernova 1006, 123n
supersymmetry model (SUSY), 182
surface of last scattering, 47
symmetry
breaking event in, 138, 139. *See also* electroweak symmetry breaking
equations describing interactions in, 139
examples of, 138–39
mathematical expression of, 138
patterns in, 137, 138
physics and, 136–38

Theory of Everything (TOE), 37, 59n, 159, 160, 161, 162
thermal radiation, 27–28
thermodynamic equilibrium, 39
