open, 75, 76 (fig.)
possibilities of planets with other beings in, 50
possible types of, based on shape, 75, 76 (fig.)
redshift measurements for earlier epochs of, 59
result of ongoing expansion of, 53–54
seeking meaning of end of, 2–5
singularity at beginning of, 32–35, 40n, 66
supernovae explosions as mile-markers for measuring, 73–74, 75, 79, 81, 84, 118–19

vacuum bubble, 154
vacuum decay, 129, 141–54, 207
black holes and, 150–53
bubble of true vacuum in, 144–45, 146 (fig.)
false vacuum and, 143–44
high-energy event and, 147–48
particle colliders and possibility of, 133
potential and, 141–42
potential barrier and, 147
quantum tunneling and, 148–50
Standard Model of particle physics and, 155
theoretical possibilities of occurrence of 146–47
timing of, 145–46, 153–54
vacuum state, 140, 142, 143 (fig.), 145
Venus, red giant phase of the Sun and destruction of, 1, 121
Vera C. Rubin Observatory (VRO), 186–87, 188, 189
Virgo cluster, and Big Rip, 113
virtual particles, 80, 94–95
Vonnegut, Kurt, 131n
VRO. *See* Vera C. Rubin Observatory

Wagner, Walter, 129
Wharton, Ken, 166
White, Lori Ann, 166
white dwarf stars
Chandrasekhar Limit and, 124
distance measurement using, 124–26
