About the Author

Katie Mack is a theoretical astrophysicist and one of the most popular scientists on Twitter, with more than 340,000 followers. Throughout her career as a researcher at Caltech, Princeton, Cambridge, Melbourne and now North Carolina State University, she has studied dark matter, black holes, cosmic strings and the formation of the first galaxies. As a science writer, she has been published by *Slate*, *Time*, and *Scientific American*, as well as having a regular column in *Cosmos* magazine.
