Your High Mast Lights Plagued by LED Driver Failures and/or Consuming Too Much Power?

Switch to BINAY MAINTENANCE-FREE Driver-Less PowerLED High Mast Area Flood Lights on Intelligent Redundant-Mode PLCDiC™ Technology System

Why Switch To BINAY's Ultra High Efficacy Driver-Less LED High Mast Lights?

DESIGNED, DEVELOPED, AND MANUFACTURED IN INDIA

Greatest light output at the lowest power consumption

By using special Ultra High Efficacy LED chips with unique High Spectral Effectivity to achieve maximum perceptible visibility at the lowest power consumption

'Touch-Free' Reliability Ensures Maintenance-Free operation

BINAY's Intelligent Redundant-Mode Driver-Less PLCDiC™ Technology eliminates LED drivers, leaving only highly reliable passive components in the luminaires on the top of the mast/pole

High Colour Spectrum boosts visible perception, even with lower lux levels

Spectrally enhanced LED lighting provides High Spectral Effectivity for greater visibility

Option of Driver-Less Automation during FOG

On foggy days, the optional Fog Sensor can automatically increase brightness or change output to warm (yellowish) temporarily for greater fog penetration

LONG Performance Life of up to 15 years

LEDs used have a designed life of 100,000 hours to L70, and lower wattage and optimized thermal management ensures more than 15 years of standard operation with minimum light degradation

BINAY ALDC™ Technology (Anti Light Depreciation Compensation)

Optional ALDC™ System allows Users to maintain the same light output even after 10 years of operation by allowing them to compensate for LED light depreciation over time

Power Savings with Driver-Less Dimming System

Adaptive mast lighting can be dimmed during off-peak hours, or as required

High Electrical Safety – NO possibility of electrical shock on Mast/Pole

Ideal for outdoor lighting fixtures; will remain safe even after 10 to 15 years

Recognized Excellence

Used with great success at various Nuclear facilities, Steel plants, Open Cast Mines and other locations
