Vision
ENGINEERING

PRECISION REIMAGINED.
PRODUCTIVITY OPTIMISED.

Empowering India's Electronics Revolution with World-Leading Ergonomic Optical and Digital Solutions.

In the fast-paced world of Indian electronics manufacturing, clarity is everything. From intricate PCB design to high-volume SMT production, Vision Engineering delivers the ergonomic advantage that transforms accuracy into throughput.

Our patented technologies don't just show you the detail; they provide the comfort and freedom of movement required to maintain peak performance throughout every shift.

MANTIS: The Gold Standard for SMT Rework

The world's most famous ergonomic stereo microscope. Its unique eyepiece-less design provides an unrivalled 3D image, making soldering, inspection, and rework faster, more accurate, and more comfortable.

Ideal for: Hand-soldering, PCB inspection, and fault analysis.

LYNX EVO: High-Productivity Stereo Viewing

Advanced stereo optics for complex tasks. Lynx EVO provides stunning 3D detail and a massive depth of field, allowing techncians to work with precision on the most densely packedboards.

Ideal for: Fine-pitch component placement and rigorous quality QC.

EVO CAM AURA: 4K Digital Inspection

Fast, ultra-sharp, and easy to use. Capture high-resolution images and videos at the touch of a button, with magnification up to 300x. Perfect for documentation and collaborative design reviews.

Ideal for: High-speed inspection, reporting, and remote collaboration.

Why Ergonomics Matters for Your Bottom Line:

Increased Accuracy: Reduce user fatigue to eliminate errors.

Greater Throughput: Work faster for longer with superior hand-eye coordination.

Reduced Absenteeism: Protect your staff from neck and eye strain.

Experience the Difference in Your Facility.
