# THE DASHBOARD

## India's Electronic Warfare Market To Grow 22% Annually, Nearly Tripling By 2031

India's electronic warfare (EW) market is valued at $2.015 billion in 2026 and is projected to reach $5.439 billion by 2031, growing at a 22% CAGR against the global market's 14.9%. Defence modernisation, the 'Make in India' initiative and regional security concerns are driving indigenous EW development and demand across aerial and naval platforms. Separately, India's broader defence electronics market is forecast to reach $11.35 billion by 2032.

## India's Electronic Goods Exports Rise 89.82% To $5.55 Billion In August

India's electronic goods exports rose 89.82% year-on-year to US$5.55 billion in August 2026, from US$2.93 billion a year earlier, according to Department of Commerce data released on September 15. Cumulative merchandise exports reached US$215.91 billion during April-August 2026-27, up 17.85% year-on-year. Taiwan recorded 108.31% growth in import value in August, although the report does not specify the electronics products responsible for this increase.

## India's EMS Market To Reach $62.07 Billion By 2031, Growing At 9.63% CAGR

India's electronics manufacturing services (EMS) market is estimated at $39.19 billion in 2026 and forecast to reach $62.07 billion by 2031, growing at a 9.63% CAGR, according to Mordor Intelligence. Contract manufacturing accounted for 61.73% of 2025 revenue, while surface-mount technology represented 52.44%. Automotive EMS is projected to grow fastest among end-user segments, at an 11.46% CAGR through 2031, pointing to opportunities beyond consumer electronics assembly and other high-growth applications.

## India Automotive Electronics Market To Reach $27.8 Billion By 2032, With ADAS And Sensors Driving Growth

India's automotive electronics market is projected to grow from $12.6 billion in 2025 to $27.8 billion by 2032, at a compound annual growth rate (CAGR) of 12%. Driver assistance systems are the fastest-growing application category, while sensors are forecast to expand at a 12.2% CAGR. Original equipment manufacturers (OEMs) accounted for 85% of market revenue in 2025, with the aftermarket projected to grow faster over the forecast period.
