GST Council backs export status for contract manufacturing

The GST Council has recommended export treatment for contract manufacturing performed for overseas customers, even when finished goods remain in India. The proposed change could reduce tax cascading for electronics and semiconductor processing, assembly, testing, repair, and other outsourced services, potentially improving the competitiveness of Indian manufacturing operations.

DGTR recommends 17% duty on Chinese PCB tools

India's Directorate General of Trade Remedies (DGTR) has recommended a five-year anti-dumping duty of 17% of CIF value on covered printed circuit board (PCB) drills and routers imported from China, following findings of material injury to domestic producer Ind-Sphinx Precision. Chinese imports rose 32% to 9.13 million pieces in FY2024-25, while price undercutting reached 30%-40%. Qualifying exports manufactured by cooperating producer Kemmer attract nil duty.

Rapidise to quadruple Manesar capacity

Rapidise plans to quadruple its Manesar electronics manufacturing capacity through an approximately ₹2 billion, three-year investment. A new 120,000-square-foot (11,148sqm) facility will add SMT capacity, automated systems, and digital production capabilities. Its component-placement capacity has reached approximately 800,000 placements per hour, supporting complex PCB assemblies, including servers and AI boards.

PEOPLE (on the move)

MiPhi Semiconductors appoints Nupur Shrivastava as CHRO

MiPhi Semiconductors, a joint venture between Micromax Informatics and Phison Electronics, has appointed Nupur Shrivastava as CHRO to support organisational expansion and memory technology development in India. Formerly Head of People for Intel India and APAC, she brings over two decades of HR experience across technology companies, including Intel, Arm, Nokia and Honeywell.

Gradiant names India MD, wins five water-treatment contracts across chip, PCB, and solar sectors

Gradiant has secured five water-treatment contracts across semiconductor, PCB and solar manufacturing, including a repeat order from a global chipmaker that is expanding its fabrication facility. It will provide ultrapure water, wastewater treatment and zero liquid discharge systems. The company appointed Hari Prasad as India MD and plans to expand its workforce by over 40% this year.

Global Electronics Association appoints Jason Palmi as CFO

The Global Electronics Association has appointed Jason Palmi as CFO, effective January 2027, to oversee financial strategy, planning, investment, and operational performance. He will serve as co-CFO with Tom Sandman through 2026. Palmi previously led Ramcel Precision Stamping and Manufacturing, doubling revenue from $28 million to $56 million within three years.
