shoes, and socks to the student entitlement kits. The aim, officials say, is "to ensure that every child has the basic academic and personal requirements needed for schooling with dignity".

Meanwhile, the TGPS project envisages upgrading selected existing government school campuses, wherever feasible, by integrating nearby or co-located primary schools and junior colleges. The idea is to optimise the use of existing infrastructure, teachers and other educational resources to provide a continuous, high-quality educational pathway from pre-primary to Class XII on a single campus, equipped with modern academic, digital, laboratory, sports and inclusive facilities. A total of 134 such campuses are proposed at an estimated cost of Rs 1,889 crore. Each TGPS is expected to accommodate around 1,500 students on a 4-5-acre campus, subject to the availability of suitable land and infrastructure.
