MAKING EVERY JOURNEY EASIER

MADHYA PRADESH USHERS IN A NEW ERA WITH THE LAUNCH OF 'MUKHYAMANTRI SUGAM PARIVAHAN SEVA'

Modern, safe and accessible public transport to transform connectivity across urban and rural Madhya Pradesh.

Whether it is a student travelling to college on time, a farmer carrying produce to the market, a patient seeking treatment at a district hospital, or a working woman commuting to the city every day, reliable public transport is an essential need for every citizen. Recognizing this need, the Government of Madhya Pradesh has taken an important step towards making public transport more modern, safe and accessible across the state.

On the birth anniversary of eminent nationalist thinker Pandit Deendayal Upadhyaya, Chief Minister Dr Mohan Yadav and Union Minister for Road Transport and Highways Shri Nitin Gadkari formally launched the 'Mukhyamantri Sugam Parivahan Seva' at a state-level event held at BHEL Dussehra Maidan in Bhopal. Introduced nearly two decades after the closure of the State Road Transport Corporation in 2005, the initiative marks a renewed effort to strengthen public bus services and provide citizens with a more convenient means of travel.

STATE-WIDE LAUNCH OF 1400 BUSES

In its first phase, the service has commenced operations with 1400 inter-city and intra-city buses across Bhopal, Indore, Jabalpur, Ujjain, Sagar, Rewa and Gwalior regions. The launch of these buses began with 351 buses being flagged off. the state government aims to augment the fleet by approximately 1000 buses by March 2027, with a phased expansion to approximately 15,000 buses by 2031. The initiative also seeks to extend direct bus connectivity to nearly 75 per cent of the state's Gram Panchayats.

The expansion is expected to benefit people living in rural areas, particularly by improving access to transport for residents of villages and smaller towns. Regular bus services will reduce their dependence on irregular modes of transport and make everyday journeys more convenient.

SAFER JOURNEYS, GREATER CONVENIENCE AND TIME SAVINGS

Passenger safety and convenience are central to the new transport system. Buses are equipped with modern facilities, including an Intelligent Transport Management System (ITMS), live GPS tracking, CCTV cameras, emergency panic buttons and passenger information systems. These technologies will enable real-time monitoring of bus locations and operations, while strengthening safety measures for women, senior citizens and those travelling alone.

The 'Chalo App' also provides access to bus schedules and travel-related information. Passengers can check service timings and availability in advance, making it easier to plan their journeys. This will help reduce unnecessary waiting at bus stations and minimise uncertainty during travel.

MODERN INFRASTRUCTURE, PRIVATE PARTICIPATION AND TECHNICAL COLLABORATION

The service is being implemented through a Public-Private Partnership (PPP) model, bringing together the operational capabilities and resources of private bus operators to strengthen the public transport network. The government will oversee compliance with prescribed standards and the quality of passenger services, ensuring a more organised system of operations.

To bring a scientific and technical approach to transport planning, important Memoranda of Understanding (MoUs) have been exchanged with the School of Planning and Architecture (SPA), Bhopal, and the Indian Institute of Management (IIM), Indore. Their collaboration is expected to support AI-based mobility solutions, improved route planning and greater operational efficiency.

CREATING OPPORTUNITIES FOR EMPLOYMENT AND LOCAL ECONOMIC GROWTH

Improved bus connectivity will help link smaller towns and rural markets with major economic centres. This is expected to support trade, tourism and local economic activity. At the same time, the expansion of bus operations will create opportunities in areas such as fleet management, maintenance, servicing and technical support, opening up new avenues for employment.

The 'Mukhyamantri Sugam Parivahan Seva' is not merely an initiative to increase the number of buses; it aims to provide the people of Madhya Pradesh with safe, accessible and dependable public transport. By connecting villages with cities, students with educational opportunities, young people with employment and citizens with essential services, the initiative represents an important step towards expanding public amenities and promoting inclusive development.

More than a transport facility, the 'Mukhyamantri Sugam Parivahan Seva' reflects the state's commitment to good governance, women's safety and rural empowerment. It seeks to make everyday mobility easier and more accessible for citizens across Madhya Pradesh.

"Our government is committed to public welfare and good governance. Through the 'Mukhyamantri Sugam Parivahan Seva', we aim to progressively extend modern, safe and affordable bus services to every town, district and Gram Panchayat across the state, making travel easier and more convenient for the people."

— Dr. Mohan Yadav
Chief Minister, Madhya Pradesh
