Ice, atomic hypothesis
Imino acid
Inclined plane, smooth
Index of dense materials, theory of
Inertia
Infrared frequencies
Inorganic chemistry
Interaction force
Interference experiments, quantum behavior
Inverse square law
Ions, defined
Irreversible thermodynamic processes, entropy for
Isotopes
Jupiter, moons of

K-mesons
Kepler’s laws
Kinetic energy
Krebs cycle

Lambda baryons
Laws, of natural phenomena
Leptons
Light
  astronomy, physics and
  electrons, quantum behavior experiment with
  emission
  energy of
  generating, burning and
  as natural phenomenon
  quantum electrodynamics
Light microscopes
Light waves
Linear momentum
Liquids, atomic hypothesis
Long-range interaction force
