The page numbers in this index refer to the printed version of this book. The link provided will take you to the beginning of that print page. You may need to scroll forward from that location to find the corresponding reference on your e-reader.

acceleration, 17n, 216n7, 216n12
Albert, David Z., 226–27n96
Anaxandridas, 46, 47
Anaximander, 11, 14–15, 100–101
Aristotle, 63–66, 69–71, 77, 78, 84, 97, 220–21nn48–49, 221n54
astronomy, 14, 65, 102
atomism, 86
atoms, 29, 85, 99, 101–2, 210
Augustine of Hippo, 180–83, 212

Bach, Johann Sebastian: BWV 56 cantata, 206
Bede, the Venerable, 85
Beethoven, Ludwig van: *Missa Solemnis*, 212
Besso, Michele, 114–15
black holes, 54–55, 127
block universe, 109, 195, 222n62
Boltzmann, Ludwig, 27–36, 136, 145, 157, 225n81
Boltzmann's constant, 217n20
brain, 153, 166, 167, 176, 179, 180, 182, 186, 189, 207, 210
  and fear of death, 207–8
  frontal lobes, 207, 209
  neurons. *See* neurons/neural structures
  and Proust, 188
  synapses, 107, 108
Buddha, 190

Carnot, Lazare, 22–23, 216n10
Carnot, (Nicolas Léonard) Sadi, 23, 28
cause and effect, 20, 21, 33, 168–69, 176
change
  and complexity, 109–10
  relations, events and world dynamics without a time variable, 117–28, 195–96
  time as measurement of change, and Aristotle's space, 63–79, 97
  time when nothing changes, 63–4, 72
  and world as network of events, 95–104, 195
Clausius, Rudolf, 23–25, 157
  equation of entropy, 27, 157, 188–89
Cleomenes I, 45–46, 47
clocks, 15, 59–63, 67, 74, 96–97, 197, 216n8
  and effect of speed on time, 40n, 197
