hydrogen bomb tests, 127
hydrogen clouds, 71

ice floes, 180
infrared light, 150, 151, 185
infrared telescopes, 163
intelligence, 199–201
interferometer, 158–60
intergalatic space, 62–74
International Space Station, 178–79
interplanetary space, 165–77
Io (moon), 172
iridium, 126–27
iron, 36, 124, 166

Jansky, Karl G., 155–56, 157
Jodrell Bank Observatory, 158
Johns Hopkins University, 103
Joyce, James, 22
Jupiter (god), 129
Jupiter (planet), 42–43, 117, 128, 129, 168, 174, 176
  gravitational field of, 176
  magnetic field of, 170
  moons of, 172
  as radio wave source, 185

Kepler telescope, 183–84
Kitt Peak National Observatory, 122
Kuiper, Gerard, 169
Kuiper belt, 131–32, 169–70
Kuwait, 179

lambda, 99–100, 102–3, 104, 106, 111, 112–13
Large Hadron Collider, 25
Laser Interferometer Gravitational-Wave Observatory (LIGO), 96*n*
Lawrence Berkeley National Laboratory, 105
LED bulbs, 51, 121
Leeuwenhoek, Antonie van, 150
Lemaître, Georges, 52
leptons, 21, 22, 23–25
Le Verrier, Joseph, 130
Levy, David, 177
light, speed of, 21, 40–41, 145
light, visible, 88, 147–48, 151, 152
  temperature of, 148
  see also electromagnetic spectrum
lightbulbs, 50–51
lightning, 162–63
light pollution, 121
light-year, 26*n*
Limited Test Ban Treaty, 161–62
lithium, 27, 119–20
Lowell Observatory, 131
Lucretius, 17
