Subject Index

Page numbers listed correspond to the print edition of this book. You can use your device's search function to locate particular terms in the text.

COVERAGE AND ABBREVIATIONS

This index covers the Prologue, Chapters, Epilogue, and Notes.
Additional information about subjects will be found in the Glossary (pages 547–60) and Chronology (pages 537–46).
Letters appended to page numbers have the following meanings:
b—box
f—figure or photograph
n—footnote
N—in the Notes, the page to which the note refers; for example, 561N26 means "the note to page 26, which will be found on page 561"

Absolute interval in spacetime, 90, 92, 91b–92b, 414
Absoluteness of space and time:
Newton's concepts of, 62–63
Einstein's rejection of, 72
implies speed of light is relative, 63, 79
experimental evidence against, 65–66
theoretical arguments against, 66–68
see also Relativity of space and time
Absoluteness of speed of light:
not true in Newtonian physics, 63, 79, 133
Einstein's conception of, 72–73, 79
consequences of, 73–76, 77b, 82
tested by Michelson-Morley experiment, 64, 78–79
tested in modern particle accelerators, 83–84
Acceleration radiation and accelerated viewpoint, 443–46, 444b
Accelerators, particle, 83–84, 86, 237, 339, 340
Accretion disk around black hole:
concept of, 46, 47f, 346
anchoring by black hole's spin, 346–47
possible roles in quasars and jet production, 346–54
Accretion of gas onto black hole:
in science fiction scenario, 24–25, 24f
as source of X-rays and other radiation, 307–9, 307f, 308f, 318
see also Accretion disk
Accretion of gas onto neutron star, 241–43, 242f
