Golden age, 258–61, 260f, 299, 341, 346, 370, 426
Grandfather paradox, 508n
Gravitational collapse, *see* Implosion of star
Gravitational lens and focusing, 41–43, 42f 303–4m 303f, 489b, 507
Gravitational redshift of light:
  description of, 32, 131–33, 132f, 142–43, 213f, 214–15, 445, 562N44
  deduced from gravitational time dilation, 131, 214
  astronomical observations of, 131, 143, 148
Gravitational time dilation:
  Einstein's inference of, 100, 102b–3b
  near surface of a star or Sun, 130–31, 214
Gravitational waves:
  nature of, 48–49, 358, 362–65, 364f
  contrasted with electromagnetic waves, 379–81
  strength of, 365
  frequencies of, 367, 386, 393
  sources of, 379–80
  emission of, 379–80
  polarizations of, 393–94
  from black-hole binaries, 48–49, 357–61, 393–96, 413
  waveforms of, 393–96, 394f
  information carried by, 49, 360–61, 394–96, 524
  extraction of information from, 393–96, 394f
  may revolutionize our understanding of Universe, 378–81, 524
  observational proof they exist, 392–93
  1940s and 1950s skepticism about, 523
Gravitational-wave detectors:
  Weber's invention of, 366–69
  bar detectors, 367–69, 368f, 372, 374–78, 385–87
  interferometric detectors, 382–96, 383f, 384b–85b, 388f, 392f; *see also* LIGO; VIRGO
  bars and interferometers compared, 385–87
  Braginsky's standard quantum limit, 372, 374–76, 386
  quantum nondemolition, 375–76, 377f, 386–87 *see also* LIGO; VIRGO
Gravitational-wave recoil (kick-back), 48, 358–59, 393
Gravity, Einstein's laws of, *see* General relativity
Gravity, Newton's law of:
  description of, 61, 93–94, 403, 405
  Einstein's objections to, 96
Gravity, tidal:
  Newtonian explanation of, 34–35, 104–6, 104f, 106b
  Einstein's explanation—spacetime curvature, 110–12, 110f, 112f
  due to Moon, 105, 106b, 111–12f, 362–65, 362b, 364f, 451
  in a gravitational wave, 362–65, 364f near singularity inside black hole, *see* Singularity, tidal gravity near
Great Terror, 181, 185–86, 233b, 268

"Hair" on black holes:
  no-hair conjecture, 274f, 275, 277
  first evidence of hairlessness, 273–75
  Israel's theorem (proof of hairlessness for nonspinning holes), 279–80
