choice of physical laws, 193b
level of rigor, 441–42, 469
idealizations, 215–17, 217f
approximations, 194b–95b, 276b
perturbation methods, 275, 276b, 296–98
arguments by analogy, 429–30
thought experiments, 110–11, 122, 128, 445–46, 492–93, 496, 500–503, 503n
Sagan-type questions, 493, 496, 497, 508
pedagogy as tool in research, 96
examples of deductive reasoning, 102b–3b, 77b
influence of names, definitions, and viewpoints, 254–56, 295–96, 401–11, 416–17
paradigms, 401–11, 416; *see also* Paradigm
mentors and their styles, 261–62, 269–72
Resistance to compression:
concept of, 149–50
of white-dwarf matter, 149–53, 154f, 156b–57b, of nuclear matter, 193b–95b, 200b–202b
of cold, dead matter, 200b–202b
see also Equation of state
Rockefeller Foundation fellowships, 179, 220
Rulers, perfect and rubbery, 397–400, 398b, 399f

Sagan-type questions, 493, 496, 497, 508
Schwarzschild geometry for black hole or star:
Schwarzschild's discovery of, 124
space warpage of, 128–30, 129f, 132–34, 132f
time warpage of, 130–31, 132–34, 132f
Schwarzschild singularity (black hole), 121, 136–37, 244, 250, 255; *see also* Black hole
Scientific revolution, 401, 403, 405
Sensor, for gravitational-wave detector, 368–69, 372, 374–76, 377f, 386
Shock waves, 173, 215–16, 217f, 238–40, 301, 307, 307f, 453
Singularity, naked, 36, 470–72, 524
Singularity, quantum gravity description of, 476–79, 478f
Singularity theorems:
black holes contain singularities (Penrose), 462–63, 468, 472
Universe began in singularity (Hawking–Penrose), 465
physicists' reactions to, 524
Singularity, tidal gravity near:
perfectly spherical (Oppenheimer–Snyder), 451–53, 452f
mixmaster, 474–76, 475f
BKL, 30–31, 468–69, 474–76, 475f
aging of, 479–80
see also Black-hole interior
Sirius, 142, 159–60, 161f, 176–77, 177f, 205, 302
Sirius B, 142–43, 143f, 145, 148, 150, 152, 155, 160, 568N143
Soviet Union:
science under Lenin, 179–81
control on travel abroad, 181, 277–78, 466
organization of science in, 287b-88b, 382
influence of Landau on science in, 181, 470–71
attitudes toward topology, 469–72
