compared with Earth and white dwarf, 143
origin of its heat, 182, 184, 191
fate when it dies, 159, 161f, 175, 177f
Super bomb, *see* Nuclear weapons research
Superconductivity, 231, 339
Superfluidity, 186–87, 186n, 208
Supernovae:
Baade–Zwicky discovery of, 166–68
photograph of, 167
energy of, 168, 171, 174f
powered by stellar implosion to form neutron star, 171, 172f, 173–75
as sources of gravitational waves, 380
Superradiance, 433n
Synchrotron radiation, 338–38, 338f

Tensor analysis, *see* Differential geometry
Texas Symposium on Relativistic Astrophysics, 240, 341–42, 498, 577N341, 577N342
Theoretical Minimum, Landau's, 470–71
Theory:
misleading concept, so not used in this book, 86
see instead Laws of physics
Thermodynamics:
concept of, 422
laws of, 422–23, 436
second law of, 422–26, 424b
of black holes, 427, 436, 442, 445–46; *see also* Entropy; Horizon; Hawking radiation
Thermonuclear burning and evolution, 197–98, 228–29, 573N229; *see also* Fusion
Thought experiments, 110–11, 122, 128, 445–46, 492–93, 496, 500–503, 503n
Tidal gravity, *see* Gravity, tidal
Tides on ocean, 35, 57, 61, 93, 105, 106b, 111–13, 112f, 362–65, 364f, 451
Time, besides the following entries, *see*
Absoluteness of space and time; Quantum gravity, nonexistence of time in; Relativity of space and time
Time dilation:
due to relative motion, 37, 66, 68, 71, 76, 78, 84, 565N66, 565N68
gravitational, *see* Gravitational time dilation
Time machines (for backward time travel):
creation of requires exotic material, 499n
as solutions to the Einstein field equation, 499n
based on rapidly spinning matter, 499n, 521
based on cosmic strings, 521, 521n
based on wormholes, 55–56, 502–4, 503f
must accompany non-quantum creation of a wormhole (Geroch theorem), 497
possible if one can travel faster than light, 498–99
paradoxes due to, 508'-15
publicity about, 516
Time machines, destruction of when first activated:
by radiation? No, 505–7, 506f
by vacuum fluctuations? Probably yes, 56, 516–21, 518f
quantum gravity controls the answer, 521, 524
