“Newton, Einstein, Schrödinger, and Dirac all rolled into one”: Talbot 2017, p. 311.

“calculations on a theory that is known to be of no use”: Ibid., p. 121.

“anxiety about the verdict of history”: Freire 2015, p. 48.

“In Portuguese, I would call Schrödinger ‘um burro’”: Talbot 2017, p. 247.

“That way seems too cheap to me”: Born 2005, Einstein to Born, May 12, 1952.

quantum physics should agree with classical physics for large objects: Einstein 1953, “Elementary Considerations on the Interpretation of the Foundations of Quantum Mechanics,” translated by Dileep Karanth, http://arxiv.org/abs/1107.3701.

“that [locality] will have to be abandoned”: Einstein to Born, April 1948, in Born 2005. Bell’s theorem, of course, is just such a fact—but Bell’s theorem didn’t come for another fifteen years, by which time Einstein was dead. See Chapter 7 for more on this.

“‘music of the future’”: Born 2005, p. 199.

they would do all of their work in “normal” quantum physics: Yakir Aharonov, interview with the author, Vienna, October 24, 2015.

“my interests began to turn in other directions”: Freire 2015, p. 54.

“so as to get a better job”: Ibid., p. 56. Emphasis in original.

Chapter 6

“more brain grease”: Otto Stern, interview by Thomas S. Kuhn on May 29 and 30, 1962, Berkeley, CA, USA, courtesy of the Niels Bohr Library & Archives, American Institute of Physics, College Park, MD, USA, https://www.aip.org/history-programs/niels-bohr-library/oral-histories/4904.

“When a mouse observes”: Isaacson 2007, p. 515.

“strange difficulties created by himself for this purpose”: Peter Byrne 2010, *The Many Worlds of Hugh Everett III: Multiple Universes, Mutual Assured Destruction, and the Meltdown of a Nuclear Family* (Oxford University Press), p. 26.

“the heretic”: Ibid., p. 30.

a resolution he couldn’t keep: Ibid., p. 32.

“probably *no* graduate student is his equal in native ability”: Ibid., p.
