Ayer, A. J., 171, 202

Bauer, Edmond, 68
being two places at once, 1, 5, 236, 291
Bell, Mary Ross, 141, 143
Bell, John, 9–10, 19, 20, 85, 87, 139, 141–162, 144(photo), 189, 191, 203, 208, 211, 215, 222(photo), 226, 233, 234, 235–241, 286, 287
  and Aspect, 216–217
  and Bertlmann, 219–220
  and Bohm, 141, 143–144, 149, 150, 151, 153, 228
  and Clauser, 195–196, 211
  and contextuality, 146–148
  death of, 238
  lecture in Erice, Sicily, 240
  and many-worlds interpretation, 240–241
  and pilot-wave interpretation, 10, 139, 141, 143–144, 145–146, 148, 149, 235, 240
  and Schrödinger's cat, 236
  speaking at conferences, 222
  and spontaneous-collapse theory, 235, 237
  and von Neumann's proof concerning Copenhagen interpretation, 9–10, 141, 143, 144, 145–146, 149
Bell's theorem/inequality, 151–153, 156–162, 193, 203, 219–221, 224–225, 238–240, 283, 285
  experimental tests of, 193–196, 203–207, 209, 210, 215–218, 293
  first popular accounts of, 224
  misunderstandings of, 159–161, 234, 264, 322–323, 342
  proof of theorem using roulette-wheels analogy, 153–157, 205
  technological applications of, 225–226
  violation of inequality, 151, 153, 205, 206, 207, 217
  See also locality/nonlocality
