Wallace, David, 260
wave functions, 16–18, 55, 56, 97, 125, 142, 236
collapse of, 17–18, 18(fig.), 37, 51(fig.), 67–68, 120, 123, 125, 134, 138, 197, 199, 231, 232, 243, 256, 271, 286, 292 (*see also* measurement problem; spontaneous collapse theory)
of entangled photons, 150
as information, 142, 233–235
universal wave function, 124, 126, 127, 128, 129, 130, 132, 133–134, 138, 158, 198, 249, 256, 259. *See also* many-worlds interpretation
See also Schrödinger, Erwin: Schrödinger equation
wave mechanics, 34–37, 38, 128
Wave Mechanics Without Probability (Everett), 128
wave-particle duality, 27, 39, 45, 46. *See also* complementarity; double-slit experiment
Weber, Tullio, 237
Weinberg, Joe, 93, 94, 95
Weinberg, Steven, 269
Weiner, Norbert, 134
Weisskopf, Victor, 31
Weizsäcker, Carl von, 33, 77
Wheeler, John, 31, 69, 71, 94, 120, 126, 128(photo), 224, 228–229, 231, 234–235, 248, 249
and Bohr, 127, 252
and many-world interpretation, 249, 252 (*see also* Everett, Hugh: and Wheeler)
and quantum foundations, 228, 233
and quantum gravity, 121
and Zurek, 229–230
See also delayed-choice experiment; Everett, Hugh, III: and Wheeler
Wightman, Art, 107, 202
Wigner, Eugene, 41, 66, 68, 69, 72, 73, 120, 133, 138, 199–201, 202, 203, 204, 208, 228, 229, 285
Wilder, Billy, 64
Wilkinson Microwave Anisotropy Probe (WMAP), 254, 255
Wilson, Robert, 248
Wittgenstein, Ludwig, 64
