

The sessions

64. Malepati Bala Siva Sai Akhil from Couchbase shared his expertise on 'Data Architecture for Agentic AI Systems'
65. Kumar Anirudha from Vibrant Labs spoke on 'Licences Are for Everyone, Not Just Lawyers'
66. Shashank Jha from ONLYOFFICE talked about 'ONLYOFFICE for Developers: Mastering Integration Tools'
67. Sandeep Athiyarath and Nitish Pillai from FCOOS Technologies gave a talk on 'AI That Does the Work: Live Open Source Automation for Small Businesses'
68. 'We Do CARE' is what Vysakh Premkumar from E-Gov Foundation spoke about
69. Rakesh Radhakrishnan from Cloudera explained how to 'Build a Petabyte-Scale Kubernetes Native Object Store with Apache Ozone'
70. Priyatam Ch from Arctic Wolf talked about 'From LLMs to Autonomous Systems: Engineering Reliable Agentic AI with Open Source'
71. 'Thinking in Qubits: A Developer's Introduction to Quantum Computing' was the topic explained by Manjunath Janardhan from Accenture
72. Abhas Abhinav, a hacker, entrepreneur and free software activist talked about 'Why it's Important to Focus on Hardware in our Mission to Run Free/Open Source Software Everywhere'
73. Abraham Gogulamudi from GEHealthcare spoke on 'Hardening IoT Devices: Defence-in-Depth on Yocto-Based Embedded Linux'
74. Aditi Bhatt from Cyient Ltd gave a talk on 'Beyond Embedded: Architecting Open Source Intelligent Systems with Camera, Radar & ROS 2'
75. Megha Mitra from Mytr.AI explained how to 'Build a Reliable Real-time Health Device Using Open Hardware, Open Protocols, and Open-weight AI'
