blight in crops:
nature of blight, 109–110
specialist vs. generalist, 110–111
Interstellar's blight:
burning blighted corn, *31*
possibility of occurrence, 31–32, 105–106, 109–111, 281
branes:
our universe as a brane in a higher-dimensional bulk, 32, 187–188
predicted by superstring theory, 187–188, 227
used to visualize the warping of space, 37–41
humans, and all known nongravitational particles and fields, confined to our brane, 49–50, 192–193
gravitational field lines bent parallel to our brane, *see* bulk, confining gravity in
confining branes, 199–201, 285
instability of confining branes: danger of brane collision and destruction of our universe, 219
see also bulk; fifth dimension; Professor Brand's equation; tesseract
bulk:
descriptions of, 32
used to depict warping of space in our universe, 37–41, *39*, *40*, 46–49, *46*, *47*, *48*, *49*, *62*, *128*, *129*, *131*, *135*, *139*, *141*, *142*, *155*, *186*
existence is an educated guess, 32–33
evidence for existence from superstring theory, 186–188, 284
number of dimensions in the bulk, 187–188
confining gravity in, 194–199
problem of, 194–195
solution: curled-up dimensions, 195–196
solution: the Anti-deSitter warp, 196–201
for *Interstellar*: the Anti-deSitter sandwich and layer, 199–200
buckling instability of the sandwich, 200–201, 219, *219*
Einstein's relativistic laws in the bulk, 32, 224–225, 271
determined by the quantum gravity laws, 225
see also branes; bulk beings; bulk fields in *Interstellar*; fifth dimension; tesseract; time travel, with a bulk
bulk beings (hypothetical), 189–193, *190*, *191*, *193*
motivated by Abbott's *Flatland*, 190–193, 285
their physical nature—made of bulk fields, 192–193
appearance when they pass through our brane, 190–192
gravity, space warp, and space whirl due to, 192–193, *193*
in *Interstellar*, 137, 193, 218, 247, 259, 261, 271
bulk fields in *Interstellar*:
defined and described, 215–216
